

What They're Saying

Customer Testimonials

"We couldn't be more pleased with our transfer system. Its flexibility allows us to use it for all kinds of different parts. I see nothing but advantages."

"Our system has been running 12/12 six days a week for over three years and it's still going strong. Our only maintenance requirements have been software updates, but TTS is always available and they're here right away when we need them. Once we needed an urgent update and they did it all over the Internet. When we came back in the morning, everything was done and the system was ready to go. I call that perfect service!"

Friedel Kueng
Manager, Stamping Dept. Grass America

"If I had to buy again for this type of work, I would definitely choose a TTS transfer system. For speed and accuracy it stands head and shoulders above the competition. We do demanding forging work so we researched the market carefully before making the decision to purchase. This is state-of-the art technology and it has been great for us."

"Their service is excellent. They are extremely knowledgeable and professional. And that's not just my opinion, we were all impressed."
